

## CLAIMS

What is claimed is:

1. Paper product, in particular a calendar leaf, greeting card, visiting card etc., comprising two paper surfaces (2,3) glued to one another by an adhesive, wherein at least one germinable seed-corn is arranged between said paper surfaces (2,3),

characterized in that

the germinable seed-corn is contained in a section (4) separable along a perforation (5).

2. Paper product according to claim 1, wherein the section (4) may have any geometric form, preferably round, rectangular or oval.
3. Paper product according to claim 1, wherein the section (4) comprises folding lines for producing a three-dimensional body.
4. Paper product according to claim 1, wherein the adhesive is a decomposable adhesive.
5. Calendar comprising a plurality of paper products according to claim 1, wherein said paper products (1) are coupled with each other by means of connecting elements (8), e. g. eye rings or an adhesive.
6. Calendar according to claim 5, wherein the respective paper product (1) is divisible into a calendar leaf (9) and a section (4).
7. Calendar according to claim 6, wherein the section (4) has the dimensions of a postcard.

8. Visiting card made from a paper product according to claim 1, wherein said paper product is divisible into an address field (10) and a section (4) with the perforation (5) being provided between the address field (10) and the section (4).
9. Greeting card made from a paper product according to claim 1, wherein said paper product is divisible into an inscription field and a section.
